

# IGAS

Engineering and Supply of Security Products

## We bet for Quality and Innovation

Based on these two pillars, SIGAS has grown to currently become the **leading** company in the distribution of the clean agent 3M™ **Novac™ 1230**. This has established SIGAS as one of the references in **fire protection** industry.

The result of this working line is our wide range of **products** in different areas of the **security** industry, from **fire protection** to **intrusion** systems.

# SIGAS

We are committed to provide our customers with the **best service** and the **quickest answer** to their **needs**.

To accomplish this goal, we have a **human force** composed of **engineering**, **telecom**, **economics** and **development** sectors. A perfect combination between more than **40 years experienced** people and young staff deserving to develop new ideas. Our non-stop training program keeps our staff ready for the new market demands.

### COMMITMENT

### QUALITY

We are **ISO 9001** certified. Our continuous improvement plan system allows us to meet the customer needs on every moment.

### DEVELOPMENT

The fire protection **market** is changing every day. **New agents**, **new technologies**, new tendencies are flooding the play ground every day. This is for **SIGAS** a work vision; we are always looking for the new product, the new system that will be fitting the **client needs**.

### PASIVE PROTECTION

**Passive protection** is used in different fields of applications such as **marine** or **telecom**. Our passive protection **catalogue** is covering all these different areas with different kind of products: **modular cable entry**, mortars, pads, **intumescent**, sponges and collars.

### CHEMICAL POWDER

We **design** the chemical powder systems **project by project**. Like that we are always sure to fit the client demand.

### CLEANT AGENT

In the last two years, we have been the **leader** in sales of the fluoroketone 1230. You can also find in our catalogue **halocarbon** and **inert gas**.

### INDUSTRIAL KITCHEN

**Protection** of the three main sources of fires in **industrial kitchens**: hoods, exhaust ducts and equipment. Our kitchens systems are design according **CTE** and the reference rules: **UL-300** and **NFPA 17**.

### CONDENSED AEROSOL

Their **exceptional features** (**versatility**, **easy installation**, **long life** and **quality**) and their **extinction method** (**inhibition**), gives aerosol a pole position in Fire Protection.

### VID DETECTION

The most **advanced** and complete integrated detection system. It analyses the **image** to detect **flame**, **smoke**, **refraction** and **intrusion**.

### CONVENTIONAL DETECTION

**Analogical** and **conventional** systems integrated with the last communications systems and **updated** according the rule.
